10 TO 11.

While the 20 per cent. reduction wages, announced by the United States Steel Corporation late yesterday afternoon was considered a constructive development by the financial community, its effect on the stock market to-day was practically negligible. Although the Steel Corporation should be able to save something like \$90,000,000 or \$100,000,000 additional annually for net earnings, outside or public buying of steel stocks was not induced. The opening was quiet, the initial transaction of United States Steel being only 200 shares, but the price gradually rose fractionally to \$5, thereby duplicating the high price of the year. Other steel stocks also were fractionally higher.

Railroad stocks assumed leadership of the market and during the first hour certain of the higher-priced dividend payers were able to show gains of a point or more. Among the lower priced rails Baltimore & Ohio was conspicuously firm, rising two points. Oil shares were firm in initial trading, with Mexican Petroleum rising about two points. Its strength was attributed to the statement of President Doneny regarding the oil situation in Mexico in which he reiterated that the outlook of the Mexico oil fields is decidedly favorable, and that stories recently heard regarding unfavorable developments, including the appearance of salt water in the more important fields is nothing more than propaganda.

The renewal rate for call loans was reduced to 6 1-2 per cent., despite the fact that the Government withdrew \$13,000,000 from tocal banks yesterday, and will withdraw an additional \$19,000,000 to-

War-Time Navy"

Series of 30 Absorbing Articles by Josephus Daniels, War Navy Secretary.

Most readable, meaty, important newspaper series printed in New York in many years.

All the inside facts about your fighting fleets, war-time tasks and achievements told frankly by the only man to whom the facts are known.

And told by a man who knows how to write a first-rate newspaper story.

Everybody who likes to read a newspaper will want to read every instalment. Every one is unique. There has never been another series of newspaper articles quite like this one.

The navy did the job set for it in the war—a big job. There was "Hell All 'Round." The hitherto untold story of it is a big story very big. And Daniels is the one man qualified to tell it first-hand, because he is the one man who knows all that happened.

That is one element which makes the story superlatively interesting. It is crammed with fresh information and revelations which could flow from no other source.

The other thing which makes it grip you so is the way in which it is told. Readable, direct, pithy, human, entertaining; it makes the best of good reading.

Get The World, and begin with the first instalment.

Starts Thursday morning, and appears daily thereafter.
